

100 mm — measure after printing; must be exact

DICT_4X4_50 · marker side 36 mm INCLUDING the black border · cell 6.000 mm

Print at 100% / “actual size”, fit-to-page OFF. Matte paper, not glossy.

Cut on the grey line. Keep the whole white margin — it is the quiet zone and detection needs it.
Measure a printed marker edge to edge and use THAT number as markerLength in the pose code.
